ANSHUMAN SINGH

Jaipur, Rajasthan — +91-7976004535 — anshumansingh5511@gmail.com — LinkedIn

PROFESSIONAL SUMMARY

Versatile B.Tech Computer Science student with a strong foundation in Python, computer vision, and AI-integrated systems. Experienced in developing computer vision applications, automation solutions, and embedded systems that bridge hardware and software. Proven ability to tackle full-stack challenges through hackathons, project expos, and technical presentations. Eager to apply CS fundamentals to build scalable, high-performance solutions that make an impact on millions of users.

WORK EXPERIENCE

UDAAN AEROMODELLING CLUB *7-11-2025 – Present — Jaipur, Rajasthan*
Graphic Designer

- Designed social media graphics, posters, banners, and event branding collateral for college-wide campaigns using Canva Pro and Figma, ensuring visual consistency across all club communications.
- Collaborated with club leadership to create promotional materials for the annual aeromodelling event, contributing to increased student awareness and campus-wide participation.
- Developed and maintained a cohesive visual identity for the club's social media presence, designing engaging posts that reached the college community and beyond.
- Streamlined design workflows by creating reusable templates in Canva Pro, enabling faster turnaround for time-sensitive campaign materials without compromising quality.

AICTE IDEA LAB *15-6-2026 – 30-6-2026 — Jaipur, Rajasthan*
Intern

- Developed and tested a Smart Traffic Monitoring System prototype at AICTE IDEA Lab, integrating Arduino-based hardware with Python algorithms for real-time vehicle detection and traffic analysis.
- Assembled and tested electronic circuits and sensor modules, troubleshooting hardware-software integration issues to ensure reliable prototype performance.

EDUCATION

Poornima College of Engineering *2029*
Bachelor of Technology (B.Tech) - Computer Science

Tiny Tots Public Senior Secondary Sechool Barmer *22-5-2025 — Barmer, Rajasthan*
Higher Secondary Education
89.6%

COMPETITIONS & EXTRACURRICULARS

TechnoTarang Hackathon 3.0
Participant

-

Project Expo 4.0
Participant

-

Udaan Aeromodelling Club
Organizer & Participant

- Managed promotional design efforts and actively participated in the annual aeromodelling event.

APOGEE '26 (BITS Pilani's Annual Technical Festival)
Participant

- Presented a technical pitch deck and live demo demonstrating innovation in explainable AI and automated talent verification.

CERTIFICATIONS

Google Ads Apps Certification
Microsoft Copilot: The Art of Prompt Writing
The Field Guide to Human-Centered Design
What Is Generative AI?
AI Skills for Students

CORE TECHNICAL SKILLS

General: Python, C/C++ (Arduino), Embedded Programming, Canva Pro, Technical Writing, YOLO (Computer Vision), Gemini API, pyttsx3, Generative AI, Prompt Engineering, Human-Centered Design
Technical Skills: Python, C/C++ (Arduino), Embedded Programming, Canva Pro, Technical Writing, YOLO (Computer Vision), Gemini API, pyttsx3, Generative AI, Prompt Engineering, Human-Centered Design

KEY PROJECTS

AI-Driven Vehicle Counting System

- Designed and deployed an AI-driven vehicle counting system using YOLO computer vision, integrating Arduino hardware with Python algorithms to process and analyze real-time traffic data with high accuracy.

Smart Traffic Management System

- Built a smart traffic management solution combining computer vision and embedded hardware, optimizing vehicle flow through intelligent signal coordination to reduce congestion based on real-time traffic pattern analysis.

Flame and Smoke Detection System

- Engineered an Arduino-based embedded system for real-time fire hazard detection, implementing sensor data fusion algorithms to trigger rapid alerts upon detecting flame or smoke signatures.
